***Minneapolis/St. Paul Business Journal Reveals Its List of the  
50 Fastest-Growing Private Companies in the Twin Cities Metro Area***

**GetWireless Ranks No. 7 on the 2009 Fast 50 List  
With Three-Year Sales Growth of 187.2%**

**MINNEAPOLIS, October 23, 2009** – Minnetonka, Minn. based GetWireless, a national distributor of cellular-based solutions, announced that it has been named once again by the *Minneapolis/St. Paul Business Journal* to the Fast 50 list of fastest-growing private companies in the Twin Cities metro area. This is the third year that GetWireless has earned the distinction.

The list of this year's Fast 50 honorees was announced during an awards ceremony on October 22 and published October 23 in the *Minneapolis/St. Paul Business Journal*. Organizations secured a place on this year's Fast 50 list based on their revenue growth between 2006 and 2008. GetWireless' growth of 187.2% during this period ranked them as the 7th fastest growing privately held company in the Twin Cities metro area.

"On behalf of the entire GetWireless team, we are very excited to be honored on the Fast 50 list for the third year in a row," said Brian Taney, chief executive officer of GetWireless. "Despite a soft economy, we are working diligently to continue our growth and aim to be on the list again next year."

To qualify for the Fast 50 list, companies must be independently owned and privately held, headquartered in the Twin Cities metro area, experience year-over-year revenue growth for each of the past three completed fiscal years, and have revenue of at least \$1 million in the first of the three most recent fiscal years.

**About GetWireless, LLC**

GetWireless, LLC is a national distributor of cellular-based solutions serving industries in which communications are critical and landlines are not readily available. GetWireless provides service and support for a multitude of voice, fax, data, and telemetry applications that operate on the world's existing cellular networks. The company currently services 2,000 customers in the enterprise, public safety, television and broadcast, healthcare, and government industries.
