

## Sierra Wireless AirLink® Antenna: High Gain Directional

### AirLink® Antenna: High Gain Directional

Tested and certified to operate with AirLink routers and gateways, the High Gain Directional provides 2x2 MiMo signal boosting 2G, 3G and 4G LTE networks. Incorporating two separately fed wideband elements in a single housing, the High Gain Directional is equipped to provide client side MiMo and diversity support. With 6dBi of peak gain at 698-960MHz and 9dBi peak gain at 1710-2700MHz, this antenna provides extra gain for next generation networks.

The rugged, weather resistant housing is designed for wall mounting and comes with wall and mast mount brackets.
