

External Antenna Solutions

2J is a worldwide supplier of antenna solutions supporting Automotive, Marine, Telematic, Automation and IoT markets.

These external antennas provide either a single cellular (2G, 3G, 4G LTE) solution, a single ISM band (868MHz, 915 MHz, 2.4GHz, or 5.0GHz) solution, or a combo which provides cellular + GNSS. The antennas are divided into their different mounting styles.

External - Connector Mount:
