

# Safe Distancing Solution for the Workplace

An innovative technology solution to keep employees safely distanced in their work environment.

Employee Worn Wearable  
Bluetooth/LoRa Badge Sensor

Option LoRa / 4G LTE Gateway

Cloud-Based Distancing Platform

It is proven that safe-distancing is an effective way to limit and decrease the spread of infectious diseases like COVID-19 and Influenza. This solution allows businesses to safely bring their employees back to the workplace while monitoring their close-proximity interactions and ensuring that proper distancing guidelines are being followed.

- Promotes employee distancing compliance by tracking and cataloging close proximity interactions.
- Provides historical and real-time employee interaction data.
- Supports employee and guest interactions across multiple locations.
- Offers a simple and economical solution for organizations of all sizes.

Established in 2001 and based in Minneapolis, GetWireless is a dynamically growing, award-winning Value-Added Distributor of cutting-edge IOT Connectivity Solutions with channel partners across the country, including Value-Added Resellers, System Integrators, and Solution Providers.
