

WIRELESS WATER ROPE SENSOR

The wireless water rope sensor uses a water rope to detect the presence of water or other liquids. If any point along the rope becomes wet, an alert is sent to the wireless network.

Indoor / Smart Building

Outdoor / Industrial

FEATURES

- Built-in radio that talks directly with the LoRaWAN wireless network
- Two types of tamper detection: enclosure Tamper and wall mount tamper
 - Enclosure tamper
 - Wall mount tamper detects (indoor version)
- 200,000+ transmissions on a single battery and a 5-10 year battery life depending on usage
- User replaceable battery
- Fully integrated internal antenna
- Over the air sensor configuration in the field
- Automatic low battery reporting and supervisory (sensor health) reporting

APPLICATIONS

- Detect basement flooding
- Sump pump failure
- Leaking toilets
- Broken or leaking plumbing
- Frozen water pipe detection
- Fuel leakage
- Server room protection
- Retail store customer safety
- General water or liquid sensing
