

Built for what's now. Ready for what's next.

Future-Proof Public Safety Communications with AirLink XR60

The Problem:

Public safety organizations face evolving technology landscapes, changing network standards, and increasing demands for real-time data. Investing in equipment that becomes obsolete in just a few years can be costly and disruptive, especially when agencies rely on consistent, long-term performance in the field.

The Solution:

The AirLink® XR60 provides future-proof connectivity for public safety with ultra-reliable 5G, Wi-Fi 6, and edge computing in a compact, rugged design. Dual SIMs with automatic failover, including FirstNet® support, ensure always-on access. With advanced security, remote management, and a 5-year AirLink Complete subscription, it's built for long-term mission-critical performance.

Why Choose Semtech XR60?

Rugged Design

High-Speed Connectivity

Compact Size

Remote Management

Five Years of AirLink Complete
