UNLOCK NETWORK SLICING

Just add the Gen 2 XP Cartridge to your existing XR80s / XR90s..

OVERVIEW

Add a Gen 2 XP Cartridge to your existing Gen 1 XR80 or XR90 routers and instantly enable next-generation capabilities like public safety network slicing and enhanced 5G SA performance.

No new router purchase required.

Low Cost Upgrades

Cost effective option: swap the cartridge, not the hardware.

Network Slicing Ready

Unlock new public safety and carrier slicing capabilities instantly.

Higher Performance

EM9293 radio delivers more CA combos and improved throughput.

Easy Installation

Modular design means faster, simpler upgrades than legacy devices.

WHY IT MATTERS

- Extend the lifecycle of deployed XR80/XR90 fleets
- Access new slicing-dependent network offerings
- Full compatibility with existing antennas
- Gen 1/Gen 2 radios can operate in the same router
- Same price as the Gen 1 cartridge

COMPATIBILITY

Gen1 XR80/XR90

Gen2 XR80/XR90

XR80/90 Antennas
